| 65+       | 55         |

Subbase til Sentronic D, DN4

- 
- A large, industrial-grade hydraulic valve manifold, likely a 4/3-way valve, with multiple ports and a control lever. The manifold is made of polished metal and features several circular ports of different sizes. A control lever with a blue and yellow label is mounted on top. The label includes a red square and the text "SANTOVALVE". The manifold is shown from a perspective view, highlighting its complex structure and multiple connection points.

Moduludformet baseplade til montering af Sentronic<sup>D</sup> proportionalventil med flangtilslutning. Hvis det bliver nødvendigt at udvide ventilenheden senere, er det nemt at tilføje baseplader. Basepladerne har fælles lufttilførsel og aflæsning, således at der kræves langt færre slanger.
