

LUMISTAR EX LAMPER, ATEX

Aluminium

P-L3541.126.00

USL 07-Ex skueglas lampe 120-12V/50W

- Alle Ex skueglas lamper er godkendte til Zone 1
- Forsyningsspænding afhængig af type:
12V/24V/120V/230V
- Effekt afhængig af størrelse: 20W, 50W, 100W
- Anvendelig til skueglas armatur DIN28120/DIN28121 og DIN11851
- De fleste i beskyttelsesklasse IP 65 og IP 67 iht. DIN EN 60529

PRODUKTBESKRIVELSE

Lumistar Ex lamper til montering på glasfittings:

Denne type belysning til skueglas er designet til universelle anvendelser i eksplosionsfarlige omgivelser. Lumistar Ex lamper er ideelle til brug i kombineret syns- og lysanordning (enkeltflange version) eller med to separate porte (2-flange version).

Kompakt design - kraftig lysudgang:

Egnet til cirkulære blikglasbeslag til DIN 28120 / DIN 28121 eller lignende, skruetype glasfittings i overensstemmelse med DIN 11851 og til visuelle flowindikatorer.

Generøs lysåbning og bekvem lampeudskiftning takket være optimalt designet skruet linselukning.

Anvendes til belysning af tanke, beholdere, siloer, omrørere og andre for det meste lukkede applikationer, beholdere og reaktorer samt visuelle flowindikatorer i eksplosionsfarlige omgivelser. Velegnet til brug i fødevarerindustrien.

• Mechanical installation:
When installing the round light glass fitting or the light flow indicator, the luminaire is mounted on the cover glass with the hinged bracket. With the screw-type right glass fitting, the lamp is mounted on the ground nut or by means of a flange attachment - see 6) below.

The Luminaire luminaires AL510Mg and ES: 55-LED is compatible with the following terminal diameters:
a) Circular right glass fitting acc. to DIN 28120: DN 40
b) Circular right glass fitting acc. to DIN 28121: DN 40
c) Right glass fitting in flow indicators: DN 50
d) Screw-type right glass fitting similar to DIN 11851:
- DN 50 is mounted by use of a separate flange attachment from DN 50 up, the unit is secured using the hinged bracket

Luminaire luminaires AL510Mg and ES: 55-LED have a special adapter in the light port as a standard feature, making this type of lamp ideal for applications in electric and fluidic environments. Excellent results are achieved by using light glass fitted to a metal frame (METAGLASS) and with the AL510Mg (ALUMINO) ring of products. METAGLASS combined optimally with clamp fittings (METACLAMPS) as well as with BA Connect™ technology.

• For luminaire luminaires intended for sterile environments, the following installation and fastening method is prescribed:
- The luminaire is fitted over the flared male part of the cover glass, where it is secured in place. An O-ring inserted between the two effectively seals the closure to the light port. An alternative is to use the luminaire luminaires with an adapted clamped joint acc. to DIN 32476/ISO 2852. The mating flange to the flanged connection is a special annular construction with a fixed in light glass (metal flange), see Example 1.
- When used with screw-type right glass fittings, this metal-glass ring is provided with a vented hole over which the luminaire luminaire is fitted. An O-ring is inserted to seal the joint, tightening the clamp then provides the necessary closing pressure, see Example 2.
