

SANYO DENKI

SH214

Hybrid stepmotor 14 mm

SH2141-5541

- Højt holdemoment
- Lang levetid
- Muligt at tilpasse

**PRODUKTBEKRÆFTELSE**

Sanyo Denki's F2 series of step motors are available in sizes from 14 mm to 106 mm. Beyond the standard, these can be customized to your needs, such as Brake, Encoder, shaft design and wiring. Trinmotors with their precise start and stop are commonly used in medical equipment, printers and applications that require precise positioning.

SPECIFIKATIONER

Antal akser	1 pc
Holding torque	0,0065 Nm
Induktans	4,2 mH
Længde	30 mm
Modstand	21 Ω
Moment of inertia	0,00058 g.cm ²
Phase current	0,3 A
Step angle	1,8 °
Vægt	0,03 kg
