PRODUKTBESKRIVELSE

Et Tescom™ gaspanel er en kompakt, central enhed, der sikrer at man kan skifte mellem en eller flere gascylindre uden at miste flowet og samtidigt at bibeholde et stabilt tryk. Panelerne fås i forskellige udformninger og med forskellige tilbehør, og anvendes med fordel til at regulere flowet af gasser i fx laboratorier, hvor et kontinuerligt gasflow er ønskeligt. Tescom kan levere gaspaneler i messing og rustfrit stål og kombineret med et kontakt manometer, kan man også overvåge hvornår cylinderen er ved at være tom og det er tid til at skifte.
