
the pressure vessel has to be calculated for
adequate reinforcement at its particular size ("D")

categorie: IV
module: G
test pressure see enclosure
marks acc. appandix I No. 3.3. PED

max. working pressure: +4/-1bar/FV
max. working temperature: +280°C

execution of the weldingprocedures by examined welders with a testet filler metal (TÜV/ASME)
weldingdetails according to drawing No.: 1001

material test reports for pressure frequented parts:
plate: 3.1/EN10204 AD-W2 (W10) / ASME
flange: 3.1/EN10204 AD-W2 (W9) / ASME

safe load implementation of joint components position 11-17 acc. to techn. report No.: WB-M-960127121 attachment with drawing No.: 200 00 02
cutting test and non-destructive test acc. to AD - instructions HP 5/2 and 5/3
